PriorityPak™
Automated Packaging System

**A High-Speed System Solution That Encapsulates
Products In A Ready-To-Ship Protective Package.**

PriorityPak™ Automated Packaging System

Easy To Use, Versatile Cohesive Packaging Enhances Productivity

The Integrity of Cohesive Packaging

The PriorityPak™ system encapsulates your products in a cohesive-coated protective package that locks and seals products in place to minimise shifting; providing superior product protection from the rigors of shipping and handling.

Dramatically Increase Productivity

Depending upon product length, the PriorityPak™ system can create up to 20 packages a minute, compared to only 1-3 packages a minute by manual methods. This shortens the packaging process and maximises your use of labour.

Determine The PriorityPak™ System That Suits Your Packaging Line

PriorityPak™ System Manual Label Configuration

Simply place the product on the bottom material web, apply the mailing label to the top web, and push a button to create a package.

PriorityPak™ System With In-Feed Conveyor

For a faster, more automated approach, simply place a product on the lugged in-feed conveyor. After the smart sensor technology automatically detects the dimensions of the object, the system creates a custom package ready for label application.

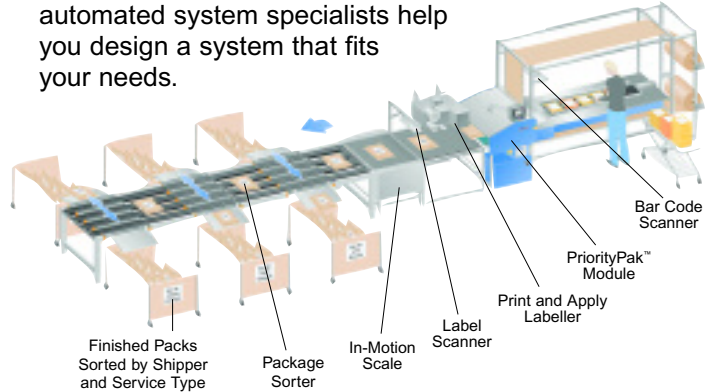

PriorityPak™ System With Enhanced Functionality

To maximise productivity, add a scanner and automatic "print and apply" labeller to the lugged in-feed conveyor system for continuous packaging.

Customise A System For Your Operation

The PriorityPak™ system can be seamlessly integrated into existing packaging lines, interfacing with other automated equipment. Let our automated system specialists help you design a system that fits your needs.

PriorityWrap™ packaging eliminates cartons, tape and void fill materials, saving you postage while safeguarding your products.

Choose The Right Material For Your Application

PriorityWrap™ Bubble Laminate provides strong, yet lightweight, protection. It is best for odd-shaped items or products in need of maximum cushioning and surface protection, like cosmetics, pharmaceuticals, CDs and DVDs.

PriorityWrap™ Rigid Board utilises our patented XRS Roller System creating a crescent seal that suspends the product, minimising product shifting and providing additional corner protection. Ideal for flat, evenly shaped items, like books and calendars.

Specifications

System: Electrical: 220-240V, 50 Hz, 16A Air: 7 bars - Capacity: from 113 to 283 Litre/minute		
Material	PriorityWrap™ Bubble Laminate	PriorityWrap™ Rigid Board
Width	250mm-300mm-375mm	300mm / 380mm
Linear Metres	150m	190.5m / 152.40m
